

## *Euglena gracilis* var. *saccharophila*

**Sample name:** *Euglena gracilis* var. *saccharophila*

**Accession number for 16S rRNA partial gene sequence:** Not available

**Classification:** Eukaryota; Euglenozoa; Euglenophyceae; Euglenales;  
Euglenaceae; Euglena

**Metabolism:** Autotrophic (oxygenic photosynthesis)

**Origin:** Pond water

**Collection:** UTEX (TX, USA)

**Sample concentration:**  $7.77 \times 10^6$  cells/ml

**Sample count on filter substrate:**  $7.77 \pm 0.78 \times 10^7$  cells

**Laboratory growth conditions:** 25 °C, up to 6 months

**Culture medium:** Euglena medium

**Sample photograph:**

**Sample micrograph:**
